THE REDCLIFF REVIEW, THURSDAY, JULY 17th, 1930

Number 19

Mill Rate To Be Same as Last Year

Utilities Commission Sets the Rate at 55 Mills

At the council meeting last Monday a letter was read from the Utilities Commission approving of the recent assessment and setting the mill rate for this year at 55 mills made up as follows: Town and general debenture 25 mills. For School purposes 30 mills. Water frontage 110¢ per foot. The usual discounts for payment of taxes within specified dates were also approved.

Mr. Trimboth, manager of the Dominion Greenhouse waited on the council and complained of the present water rate charged for his plant. He asked that a meter be installed. After some discussion it was decided that the present rate of \$5.00 a month be continued.

The offer of \$55 from Mr. Beron for building near rolling mill was accepted.

On motion of councillors Dacre and Campeau the town constable was instructed to have garage on second St. locked up.

Mr. Atwood wrote offering \$55 for building on Third street. The offer was accepted.

Mr. Badaeu wrote offering \$450 for house and lot on Fifth street. The offer was accepted. A list of town tenants who were in arrears for rent was read and instructions given to have same collected.

On motion of councillors Dacre and Brydell that the local gas co. be notified that one of their gas mains on eighth Ave. was in a dangerous condition and that the Company be instructed to have same fixed at once.

Two Fires in Town

Last Monday

Two Barns and Contents A Total Loss

Between five and six hundred dollars worth of damage was done in two fires which took place within a few hours of each other here last Monday.

The first alarm was sounded about noon when it was discovered that the stable belonging to Mr. Carney in the west end town was on fire. Shortly after the brigade returned from this call a second alarm was sent in from Mr. Waters whose barn on the adjoining lot was ablaze. In both cases the brigade was on the scene in good time but as both buildings were mere shells with all kinds of inflammable material lying around there were soon beyond control and the brigade confined its efforts to saving the houses and other surrounding buildings. In both buildings there were wagons, harness and other farm implements and some hay. All were a total loss with no insurance. The cause of both fires is unknown but it is supposed children were playing with matches.

All the World Loves A Good Sport

A few weeks ago old Country papers were landing the sportsmanship of an English earl when, after the race had started, waited for his Canadian opponent to get intangled from a bump in which he got tangled up. The race proceeded and the Canadian won it. About the same time

Liberal Policy is Hard on Farmers

Dairy and Sheep Men Suffer From Liberal Treaties.

It looks now as though it required a general election to awaken prairie farmers up to the realization of just what the iniquitous trade treaties entered into with Australia and New Zealand by the King Liberal government has meant and in meaning to them.

These treaties, coming as soon as prairie farmers were beginning to follow scientific and economic advice by going more into the mixed farming, and branching out than just grain growing, have been most discouraging and disappointing, since they have been the means of robbing this class of farmers of much of the fruits of their labors, by unfair competition through these unreasonable and one-sided treaties. Those who are being effected most by these treaties are farmers who, at considerable initial expense, have come into the sheep business and dairying industry.

Imports of New Zealand butter into Canada from January to May of this year amounted to 28,792,292 pounds. This amount displaced the output of 151,538 Canadian cows owned by Canadian farmers. At the present time two British freighters are en route to Halifax from New Zealand with ten million pounds of butter, or the product of another 52,632 Canadian cows.

The result of these large imports is that prairie farmers are this year getting only about half as much for their butter fat as they did before the Liberal government made the treaty with New Zealand.

A similar treaty with Australia has played havoc with western sheep ranchers in both the wool and mutton market.

The unfortunate part of both these treaties is that nobody in Canada benefits by them, not even the consumer who in paying just as much for butter and mutton as he ever did. Only the New Zealand dairy farmers and the Australian sheep farmer benefit by them at the expense of Canada.

Referring to these treaties Hon. R. B. Bennett, Conservative leader, said:

"If it means that we are to admit free into our markets empire goods in competition with our own, without securing a real benefit for ourselves, and without obtaining a preferred place in their markets for our products then I oppose it as did MacDonald for it is not good for Canada."

Vote for Mr. Blackstock, who will support Mr. Bennett in his efforts to "Give Canada a chance."

Is your Subscription paid?

as this happened a horse race was in progress at the Redcliff Stampede when a young Canadian girl noticed her opponent in difficulty with a fractious horse. The young Canadian girl, like the English earl, came back for a fresh start.

Whether it is on the Thames the Redcliff race track or a football field all the world loves a good sport.

Of Special Interest To Canadian Labor

The Review this week is in receipt of a circular letter from W. T. Burford, secretary treasurer of "The All Canadian Congress of Labor" which says in part as follows:

"The Liberal party at its national convention in 1919, pledged themselves to take measures to assure the workers adequate protection against the evils of unemployment and involuntary. The King government has, however, taken the stand that its policies have produced so much prosperity that unemployment is not a problem of any consequence, and has wholly ignored the pledge of its party."

In his speeches throughout the Dominion Hon. R. B. Bennett, leader of the Conservative party, realizing the seriousness of the unemployment situation has pledged himself that when returned to power he will, if necessary, call a Special session of parliament, to deal especially with the unemployment question. This should be a good hint to Labor throughout Canada as to how they should cast their vote in the election on the 28th of this month. Vote for Blackstock, Mr. Bennett's representative in this constituency.

Wheat Pool Candidates Are in the Field

Messrs. C. Axelsson, W. Bertwistle and W. Yates are the three candidates up for election to represent district C2 on the wheat Pool Board. Ballot papers are now being distributed among members of the Pool.

Hear Blackstock On Radio June 24th

Radio owners throughout this constituency will have this opportunity of hearing G. M. Blackstock, Conservative candidate addressing them over the air at 8:30 o'clock on Thursday evening, July 24th.

Arrangements have been made with C. F. A. C. to broadcast Mr. Blackstock's address to the electors on that occasion. This has been found necessary owing to the extent of this constituency and impossibility for Mr. Blackstock to visit the several towns and districts in the short time between now and election day.

Gordon Memorial Pastor is Inducted

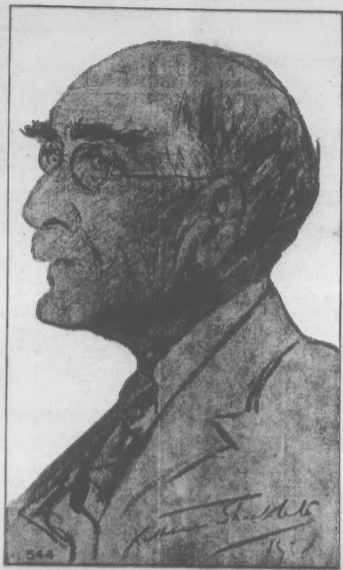

Rev. R. E. Pow the new Pastor is now in Charge Here.

Last Friday at Gordon Memorial Church the induction of the Rev. R. E. Pow, B. A., lately of Edmonton, was conducted by representatives of the Methodist Ministry. The Rev. Joseph Lee, of Memorial United Church, Medicine Hat, delivered the charge to the minister, and the Rev. A. Willis Cam addressed the congregation.

At the close of the service a reception was held and a welcome given to the new minister and his wife and family. The ladies of the Church served a dainty lunch.

The Brick & Coal football team played a friendly game with the team of that town. Despite the long drive the Bricks put up a good game but lost out by 2 goals to 1.

"Lady of Snows" Gets Hot

Richard Kipling, poet of Empire and incidentally colour of the phrase "Our Lady of the Snows" as a description of Canada, had now another view of the Dominion. Making a flying trip to this country he struck Montreal in the middle of a heat wave that blasted the thermometer into the nineties and made the poet wonder how he ever got the idea that Canada was a land of snow and ice. "My chief impression of Canada, judged on the few days, is heat," he said, interviewed on board S.S. "Dunbar of Redford," on which he is returning to England. On a reproduction of a crayon sketch of a man in a hat, the great poet of high verse, Copyright 1930, by Canadian Pacific Railway.

Conservative Party The Friend of Labor

For a number of years past Liberal politicians and newspapers have been trying to make the public believe that the Conservative party was the friend of Capital and showed no interest in Labor.

Now that an election is on it would be a good idea for to refresh our memory by reviewing some of the things which the Conservative party has done in the interests of Labor and to contrast them with the record of the Liberal party.

What the Conservative Party Has Done For Labor.

It has made Trade Unions legal.

It granted \$2,000,000 a year for technical education to all workers.

It granted \$1,000,000 a year for agricultural education.

It established a fund of \$25,000,000 for the building of moderately priced houses for workers.

It established nation-wide unemployment bureaus.

It took a cabinet minister from the trades unions.

It first gave consideration to Old Age Pensions, and at the same time urged investigation of unemployment and sickness insurance.

It bound Canada to the eight hour working day and the six day working week.

It made available over 1,800,000 for relief during the 1929-30 unemployment crisis.

It gave 20,000,000 for highway construction.

What the Liberals Have Done for Labor.

They stopped the grants for technical and agricultural education, for building cheap homes and for the highways.

They carried out the Old Age Pensions scheme half-way, but steepest unemployment and sickness insurance recommendations.

They let thousands of Canadians go hungry last winter instead of arranging for temporary relief of unemployment as the Conservatives did in 1929.

The Conservative Party has either passed or originated every piece of social legislation on the statutes of the Dominion.

Redcliff Boy Makes Record at Sarcee

Makes Possible Score in Record Time with Machine Gun.

Capt. Osgood is a proud man these days as a result of the excellent showing made by the Redcliff boys under his charge at the camp held at Sarcee recently. The boys were complimented for their proficiency in all branches of the work but outstanding in their achievements was the record made by Private E. Podesta in handling the machine gun. In the prescribed drill for this work Podesta set the record for Alberta. Starting from attention he loaded his gun five rounds at Sarcee in 21 seconds. The possible score of ten hits on both targets. This was all done in 35 seconds, which, both for scoring and time was the record for the province and within a few seconds of the record for the Dominion.

Bray Lake U. F. A. Have Successful Picnic

Held on Local's Grounds Last Saturday.

The Bray Lake U. F. A. local which has long enjoyed the reputation of being one of the most active in the province, added another to its long list of successful undertakings when it staged a most successful picnic and a large crowd gathered from all corners of the district and were entertained to a splendid program of sports under the management of the energetic committee composed of Messrs. W. H. Teewinick, I. Wolfe and W. A. Pratt.

The program was made up of all kinds of athletic sports for men, women and children and all entered heartily into the spirit of the occasion. It was a real outing especially for the children to whom special attention was paid during the afternoon.

In the evening the hall was filled to capacity for the dance and the excellent music provided by the local orchestra left nothing to be desired. During the hour G. M. Blackstock, Conservative candidate addressed the gathering on some of the questions which are now before the electors. At the conclusion of his address he was tendered a hearty vote of thanks on motion of Mr. Bertwistle who said Mr. Blackstock had shown he had a good grasp of the needs of this farmers and a fair and reasonable remedy for the improvement of present unsatisfactory conditions.

On the whole the day was a pronounced success and great credit is due to the local and its officials for the interest they take in providing amusement and entertainment for the people of the district.

The swimming pool is a popular resort for the young people these hot days. It would be just too bad if it were necessary to close the pool for lack of support. If you have not secured our season ticket yet be sure to get it as soon as possible.

A Hobby Essential To Life

Every person, old or young, should have a hobby.

And why a hobby? Because a hobby means an interest beyond the mere task of making a living and because an interest is necessary to the enjoyment of life.

Life without interest would be a dull, prosaic affair. Yet there are some people who keep their noses to the grindstone day after day, year in and year out in a dull routine to provide the wherewithal to feed, clothe and shelter themselves and their dependents, without a let-up from daylight to dark. They never look round for some interest which will serve to brighten their lot and bring joy into their lives.

There are, of course some men who are fortunate enough to have found in their vocation that keenest and an outside interest gives to others, but it has been found by age-long experience that even such happily circumstanced individuals can and do pursue their work with better results and with greater contentment and less wear and tear when, to their work, they add a hobby.

"All work and no play makes Jack a dull boy" has been quoted so often that it has become platitudinous. Yet it is just as true today as when it was first uttered.

When the child puts his books away and closes his school desk for the day, he proceeds to enjoy himself with games and recreation in some form or another and in this manner revivifies himself for another day at school tasks. Educationists have discovered that the child who plays in reason brings to his school work an enjoyment which enables him in the long run to outstrip the pale faced bookworm. He has a balanced and therefore a happy existence and this reflects favorably upon his studies.

And so with the adult. But in place of flying kites or indulging in haphazard play, the grown up carries his enthusiasm into the field of some definite, but just as stimulating amusement. It matters little whether it be collecting postage stamps, indulging in politics, playing snuff and hammer or engaging in some form of academic study so long as it is something which arouses the interest of the participant and whets his appetite for more; and so long as it is something different from the daily task.

It is this creative interest which acts as a stimulant to the mind or a recuperative power to the physical being. It is at the same time restful and invigorating. This is why the individual with a second string to his bow, even if he is only used for recreational purposes, is more likely to make a success of life than one without it. He is able to turn again to the serious work of making a living with the hope and joy which comes with a buoyant spirit, a rested body and a clear, refreshed mentality.

It is impossible to pursue a hobby without securing these results, provided it is kept within reasonable bounds, for recreation broadens interest and interest means life. Interest with existence in life. Life without interest is mere existence.

The time to develop interest is in youth. It is too late to wait until the pains and penalties of advancing years are taking their toll and forcing retirement from active work. The individual who waits until he is obliged to slacken the traces on which he has been pulling heavily for decades before looking around for an interest will find he faces an old age of misery, for he has developed nothing to which he can turn to make his declining years worth living.

The youth, the middle aged, the old, of both sexes should have a hobby and should develop a hobby in comparatively early life.

Explores Old Theory

Plants do not harm in sleeping rooms at night," says a plan, expert of the U.S. Department of Agriculture, for "a whole greenhouseful of plants would not give off enough carbon dioxide to injuriously affect the complexion of the air."

Graded Beef In Demand

Officially graded beef is now being served in the dining rooms of the British House of Commons and in many London Clubs. Hotel and restaurant proprietors are also serving it, and the London housewife is beginning to ask for it.

Dr. Williams' Pink Pills for Pale People are the common cause of indigestion. It results in pain and nervousness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. And again Phillips' Milk of Magnesia neutralizes instantly many

uses the volume in acid. It is harmonious with the action of the stomach. You will never rely on crude methods, never continue to suffer, when you learn how quickly how pleasantly this premier method acts. Please read it. It shows you how to be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid. Each bottle contains full directions—any drugstore.

Prevention Better Than Cure

Annual Examination By Doctor Would Ensure Good Health

The annual conference of the Canadian Social Hygiene Council, at Toronto, made one sound recommendation to the public. That was to have an annual examination by a doctor.

It is a trite saying that prevention is better than cure. When a person feels well, or rather if a person does not feel ill, or is not bothered by any kind of ailment, the assumption is that the organs of the body are functioning normally, but the fact that so many people are taken ill suddenly, proves the fallacy of that belief.

Health should not be taken for granted, simply because one is apparently well. It should be proved by test, and if there is a condition that betokens a break-down of the inner machinery of the body in the near future, the doctor can repair the damage, or stave off the evil day, before it has gone too far.

Many a man or woman has got a nasty jar on visiting a doctor about some minor trouble and being told that something serious is developing, or has developed. The average being does not like visiting his doctor, and usually leaves it until circumstances compel examination, but an enormous amount of sickness, an enormous number of operations, would be avoided if the habit of obtaining an annual examination were universal.

Lot of people are more careful about the habits of their automobiles than they are about the interiors of their own bodies.

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes, their rosy cheeks and their vitality. The cause is not far to seek—they have become anaemic, that is, they are lacking in the red blood of health. The anaemic girl, if she neglects her health, may suffer from a serious ailment.

Take heed, you pale, anaemic girls, plenty of fresh air, nourishing food and rest will help you, but what you need most is a medicine that will give you the red blood that brings good health. It is created by Dr. Williams' Pink Pills. The blood of these Pills is to build rich, red blood in rich, red pure.

Dr. Williams' Pink Pills are sold by all druggists in medicine bottles or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Track Deer For Bear

Hacking back to the old days of border, Winnipeg's Public Parks Board closed a deal with the Parks of Fort William, a plan to use the brown bear from the lakehead comes to Manitoba in exchange for the deer. Each head paid freight on its own consignment.

Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes: "Several years ago I was troubled with my heart and nerves and my hands and feet would become numb and cold."

I happened to see

MILBURN'S
HEART
NERVE PILLS

I happened to see an advertisement and started taking them at once. I continued for some little time and since then I have had no return of my trouble.

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

What's In A Name?

Not Very Much As Proved By Book Publishers

The answer to the question, "What's in a name?" seems to be clearly defined as the result of a questionnaire recently sent out by a firm of book publishers in an endeavor to ascertain what sells books. The 10,000 replies received to date show that only 189 purchased the books because of their titles. More than 2,400 sales were attributed to reviews; 2,400 to advertisements and so on through the recommendation of a friend, reputation of the author, bookstore display, interest in subject, gift, lecture or sermon, with the title at the bottom of the list.

Uruguay's national anthem is 70 verses.

SCIENCE?

Here is a never-failing form of relief from sciatic pain.

Take Aspirin tablets and you'll avoid a pain-killing operation—lumbago—and similar excruciating pains. They do relieve; they don't do any harm. They make sure it is genuine.

ASPIRIN

TRADE MARK REG.

When Grain Kings Meet

Valuable Information Will Be Exchanged At World's Exhibition

In midsummer of 1933, the city of Regina will become the clearing-house for world thought and knowledge on every important branch of field-crop production and marketing. Agrarian experts from all around the globe will gather at the World's Grain Exhibition and Conference to be held at the Saskatchewan capital in late July and early August.

While some \$200,000 has been offered in more than 1,500 prizes awards for cereal, grain, clover and vegetable seed exhibits, separate sessions of the grain conference in conjunction with the exhibition are expected to be a most important portion of the program. Papers are to be read on agronomy, commercial breeding, agricultural marketing, milling and baking, agricultural machinery, insect pests and friends, and other subjects.

English and French, it has been decided, will be official languages. Provision will be made for interpreters. It is contemplated that brief resumes of all papers—whose average length is limited to 2,000 words—will be printed in the two official languages and circulated to delegates before the commencement of the meetings. The meetings will be held during the mornings of the two-week conference.

Possibility of a short series of purely scientific conferences is envisaged by the executive of the Regina gathering; if such a series is found to be necessary, the meetings will be arranged so that they will not conflict with regular conference sessions.

It Closes Pain Regions—When neuralgia strikes the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Pope Pius Has Gold Telephone

Instrument For Personal Use Is Ornamental With Mother-Of-Pearl

The Pope's small state of 500 inhabitants soon will have what is probably the greatest proportion of telephones to population in the world, with the location of a new system there will be 800 numbers, of which 600 shortly will be in use.

Pope Pius' personal telephone will be of massive gold, bearing the Pontifical seal and ornamented with mother-of-pearl. He will be able to telephone anywhere within his call passing through the exchange. Special private lines also will be installed for the Secretary of State and other dignitaries.

As the Scots Sold

The news that Welshair is being relinquished by Britain to China may recall to a few old-timers Punch's cartoon of more than thirty years ago, showing two aged Scots engaged in the following dialogue: First Scot: "Aye, we've got it." Second Scot: "I've got it." First Scot: "Aye, we have."

Use Mince's for Burns.

A catalogue of latest dietary facts for women has just been issued by a London grocer.

Old medicinal gardens of Japan date back at least to 702 A.D.

First-Aid

For all pains and aches, foot troubles, cuts and bruises, or general massaging purposes, Mince's simply can't be beaten.

MINARD'S
"KING OF PAIN"
AN OINTMENT

An Accidental Discovery

Scientists Find Fish Scales Can Be Used As Fabric Coating

For hundreds of years man has taken his clothes from the wool of sheep and the skins of animals, but now she has gone one better—she is to wear the scales of fish.

Soon the smartest vests will shimmer like mermada. A firm at Berlin has at last patented a process by which fish scales can be used as a coating for various fabrics. Among many advantages it is that the new material has a remarkable power of keeping out heat.

It is intended, also, to use a coating of artificial pearl on thin elastic coats. These latest rain-proof garments will be light and completely waterproof, and when wet they will have a beautiful pearly glitter.

The discovery that fish scales could be used for this novel purpose was more or less accidental. Scientists were endeavoring to improve the process when which artificial pearls are produced when they stumbled across the new idea.

After several attempts they found a method of washing, drying and grinding fish scales which produced a fine crystalline powder. This is now being used in the treatment of colic, and can be painted thinly over the oil skin.

Persian Balm is Irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the skin. Makes skin soft and youthful. Used by women as a powerful base and as a perfume oil to lovely completion. Used by men as an effective hair fixative or shaving foam for children, rubbing soles and protects their tender skin like the delicately cool Persian Balm.

Reindeer Trek halted

Will Not Resume Journey Until Fawns Can Travel

Three thousand reindeer, being driven across "the top of the world," into Canada, on the order of the Dominion Government, have halted their long march in the Hunt and Colville River section, until the end of the newborn season.

The herd will wait there until the new-born deer are strong enough to join the drive, which follows a route north of the Arctic Circle across Alaska to the Mackenzie River basin, of the Canadian Arctic.

Mince's Checks Falling Hair.

Market For Salt Increasing
The Canadian production of salt except for small exports is sold in Canada principally to the dairy, meat curing, fisheries, and chemical industries, and as table salt for household use. The market for salt in Canada is steadily increasing.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Guard Worms' terminator will relieve them and restore health.

According to an English weekly paper, the police always stop the traffic to let Mr. George Bernard Shaw cross the road. The idea of stopping Mr. Shaw to let the traffic pass is said to have been abandoned years ago.

The Cause Of Many Ailments

Heart Trouble May Sometimes Be Traced To Bad Teeth

You may be surprised to know that if you are suffering from rheumatism, influenza, tuberculosis, or trouble, or a number of other common ailments, the fundamental cause of your trouble may be your teeth.

Only in comparatively recent years has this fact been found. And only a comparatively small number of people have learned to take advantage of this new knowledge in treating themselves well.

The Mayo clinic, which has won fame all over the world for the high standard it maintains, and the conscientious treatment it gives patients, now insists that every person who comes up for treatment should undergo a thorough examination of the mouth, no matter what disease is apparent.

Dr. Charles Mayo once said that the great mass of the people of this generation would not die from one of the great plagues, but from one of a hundred would probably die because of some simple disease, the neglect of the cause of which is the cause of most trouble. Diseased teeth frequently are such local infections.

One by one the great agencies of the world are taken ever more interested in what the teeth are doing to the rest of the system. The life insurance companies want to know what is inside the applicant's mouth before they decide whether or she is a good risk for a policy. Lawyers hire dental employes designed to examine the teeth of their employees and see to it that they have the best chance of highest efficiency through healthy mouths.

It is therefore, of the highest importance that we be most systematic in taking the very best care possible of our teeth, and it will help us to do so if we know the cause of the disease. There is a world of truth in the old quotation, "Infected teeth are ill foundations."

There is a poor law that fails to work both ways. And while it is true that diseased teeth disturb the system, it is true that a system that is not properly fed will bring about tooth-decay. Therefore, if you have good teeth, it is not sufficient that you keep them clean; although this is highly important, it is also necessary that you choose your food carefully.

Immigrants from Italy, Greece, and Balkan States, Poland and Germany, have few teeth, surprising in this may seem. Investigation of this factor in their lives showed that they eat a simple diet, consisting of coarse foods, plenty of fruit and vegetables, and dark bread that is never eaten while it is fresh. They do not have the same opportunities that we have of indulging in white flour and refined sugar, and they seldom eat candy. On the other hand, the Mayo clinic examination of fifteen hundred patients showed that 97 per cent. had infected teeth and 60 per cent. suffered from pyorrhea.

Toothache, while about as unpleasant as anything can be, has many advantages because it is a danger signal and sometimes we are apt to be careless when we receive a very emphatic warning. The fact that you have no tooth-ache, however, should not be taken to mean that your teeth need no attention. Sometimes people have teeth that are gradually undermining their health while they are not suspecting danger. They reach middle age and find that not only are their teeth getting past the stage of usefulness, but their general health has suffered as well. One of the most intelligent habits one can form is to visit regularly to the dentist every six months for the closest co-operation with him when we get there.

Teeth, properly and regularly treated, will not decay unless decay is induced into decay. Children can be saved a lot of useless trouble with bad teeth if they are properly trained in this respect. They will not crave candies unless they are allowed to have them more than is necessary.

And a bad habit, once formed, is hard to break.

An adult who indulges in candies should do so during meal times. Candies or sweets should not be taken between meals, and if this is done the mouth will be rinsed out immediately with water. To eat candies just before going to bed is the best way to conserve tooth-ache and large dentists' bills.

If you are visiting the dentist regularly, he will soon recognize any symptoms of pyorrhea in your mouth, and the time to treat this disease is in its early stages. To avoid pyorrhea, one must avoid taking starchy and gelatinous foods, like cake, between meals and before going to bed at night. Whenever they are taken they should be followed by cleansers such as fruit. Cleanliness of the mouth is one of the greatest means of avoiding this disease. Thorough mastication helps by increasing the circulation in the gums. If you have erred in the matter of diet in the past, the best thing you can do to correct your mistake is to maintain the habit of brushing the gums and teeth after each meal.

Would Save Much Trouble

Considerable Expense Is Avoided If People Make Their Will

An article appearing recently stated that in one country in this province, and he thinks it a fair average in America, that the estate of a deceased person dealt with by three persons makes a will. The reason assigned for this is that it is repugnant to the average man to think of his own death and he hates to make his will. The article says that it is an admission that he expected to die, and he is always looking forward to the time when he will be better off and doesn't know just how he should dispose of his property.

The reason for our way of thinking is the old superstition that the making of a will is something men and women don't want to do, like the making of a tax bill, and they put off what they consider is unnecessary until it is too late, and impose a big tax on their heirs by making no will at all.

Some of the shrewdest business men make no will and when they die make wills that high court judges have difficulty in interpreting.

Then there are debt-ridden wills when the maker of the will is indebted by those who are in debt to him, and these wills often lead to protracted lawsuits.

If you make your will, if not, do it this time. If you don't, it will be inconveniently, write it out on a sheet of foolscap or even in a scribbled slip, sign it as your will, and ask a notary to witness your signature, and it will save a big expense to your family in the future. The will setting up the beneficiaries and the amount left to each will not be carried to a court, and the will will be signed and witnessed will made on a slip of birch bark, in the woods held good in a legal test.

More Sweet Clover

Planted In West

Area Seeded Is Being Increased In Manitoba and Saskatchewan

From the Dominion Seed Branch comes one of the most interesting reports of field crop development in 1930, which is that the prairie provinces are sowing very much larger quantities of sweet clover seed year after year before. The Branch reports indicate a definite trend in the direction of increasing the production of field crops throughout the West, and the best sugar manufacturers are distributing sweet clover seed for large quantities in the purpose of maintaining and improving best production. Saskatchewan is the largest producer of sweet clover seed, which will probably be supplied from Eastern Canada, and the area is also increasing the area of sweet clover seed. As a crop sweet clover costs less to produce than some of the other legumes, it is a particularly easy crop, it has a very high fertilizer value, and it can be introduced into a system of grain farming with particular ease. These are all factors which contribute to its growing popularity as a crop.

As Ordinary Citizens

King George, who was an ordinary citizen, would be "Mr. George Windsor" to similar distinctions. King Edward would have been "Mr. Albert Edward Wettin," and Queen Victoria before her marriage, "Miss Alexandra." The family name of the House of Hanover to which Queen Victoria and her predecessors belonged was "Coburg."

Mr. King hit 290 trains last year, but, you'll notice, the trains are still running.

NATIONAL HOCKEY LEAGUE PRESIDENT

Frank Calder, president of the National Hockey League, was in the chair at the annual meeting of that organization, which was held at Toronto. Mr. Calder has been the leader of professional hockey in Canada for many years and of International hockey since the scope of the NHL was enlarged. He is a first-class executive officer and the best hockey man in America today.

Require Much Care

Every Locomotive Has History Card

On Which Record Is Kept of Its History. Locomotives, like horses, have to be established. When the engine has made its journey it is gently led to the locomotive shed and returned and comforted for its next journey. At the locomotive shed the resting engine ceases to do any work. After having its coat-of-arms cleaned of the driver and fireman hand it over to the shed staff, and then the whole engine is carefully examined and cleaned and oiled so that no defect is likely to escape examination. After running a thousand miles an engine undergoes a special examination and overhauling, which includes the washing of the engine, the cleaning of the steam tubes. Even more severe examinations follow after every 5,000 miles, after every 10,000 miles, and after every 20,000 miles the engine goes to the central workshop to be completely reconditioned. Every locomotive is provided with a history card, in which each repair or replacement is carefully recorded. An engine has to be reported as in perfect working order before it goes out for a fresh trip, but even this does not absolve the driver from responsibility. He has to satisfy himself that there are proper supplies of fuel and water aboard, and that all the working parts of the engine are properly lubricated, before he begins a journey.

Would Make Crop Universal

The Imperial Bureau on Soil Science is preparing technical papers on the subjects of a culture for the introduction of Lucerne cover seed which will make cultivation of the annual broadcast the crop practicable the world over. Rt. Hon. Charles Addison, parliamentary secretary of the British Ministry of Agriculture, announced in the House of Commons.

Island Well Named

Niangu Island, in the South Pacific, from which astronomers will observe a total eclipse of the sun next October, is known as "Tinian Island" because mail for its inhabitants is sealed in a tin can and thrown overboard by the monthly inter-island steamer, a native swimming out and returning it.

CAPTAIN J. MCCANNELL GETS THE HIGH HAT

It's an old custom. Every year when the first great lakes steamship gets to Port William from Port McNicoll, after the ice break-up, the captain is presented with a silk hat by the city officials. This year Captain J. McCannell, of the Canadian Pacific steamship "Anishnabe," was the lucky man and he looks mighty pleased, too.

Demand For Land Continues

Largest Number Of Entries This Year Made By New Prince Albert

The demand for quarter sections each of 160 acres, of free homestead lands in Western Canada, are given by the Canadian Government to settlers, continues to increase. In the first three months of this year there were 2,554 entries registered representing 413,240 acres compared with 2,406 entries representing 364,900 acres in the corresponding three months last year. Of this year's entries 108 were in Manitoba, 629 in Ontario, 1,420 in Alberta, and 107 in the Railway Belt, and Peace River Block, British Columbia. The largest number of entries were made in the Prince Albert, Saskatchewan, district, a total of 409. The Edmonton, Alberta, district, was second with 277 and the Peace River district, third with 145.

The Canadian Government requires a registration fee of \$10 to be paid by each settler to whom a quarter section of homestead land is granted, and the settler must do a certain amount of cultivation and fulfil other requirements as to residence, etc., within three years. These homestead lots are now for the most part at some distance from railways but with the rapid advance of settlement and good roads they are in increasing demand.

Record Bible Sales

Over Forty Million Copies Were Purchased Last Year

More than forty million Bibles were sold last year—a record. The figure surpasses all previous records by 5,000,000 copies.

The British and Foreign Bible Society, of London, England, whose report for 1929 will shortly be issued, sold 32,000,000 copies of the Testaments and the Gospels.

The sales of the National Bible Society, of Scotland, accounted for another five million copies, while the American Bible Society claims a total of 15,000,000 copies of the Bible as compared with 11,000,000 in the previous year.

The 12,000,000 turnover of the British and Foreign Bible Society includes 1,800,000 copies of the whole or major part of the Old and New Testaments, printed in English. This is an increase of 775,000 in the 1928 figures. A million of these were sold in England. The remainder went to the Dominions and Colonies. The figure for Wales is still more remarkable. Sixty-six thousand copies of the Scriptures in Welsh were sold last year. That is 50,000 more than in 1928.

The Society publishes the whole Bible or parts of it in 530 languages.

Manhood's Worst Fears

"If we can abolish the fear of unemployment and the fear of war, we will be abolishing the two great fears which afflict mankind," declared Hon. J. E. Patten, Minister of Trade and Customs, in the Australian Government parliament at the annual broadcast of the Quebec division of the Canadian Manufacturers' Association. Mr. Patten is now on his way home from the naval parade.

Servitors Are Voluntary

Many hundreds of voluntary observers throughout North America are collecting information concerning the numbers of water-fowl observed on specified days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and those for the United States to the Biological Survey, Washington, D.C.

Production Of Timothy Seed

Experiments Show Broadcast Method Is Best

Timothy is one of the most universally grown hay crops in Canada, and consequently a considerable quantity of seed of this crop is required each year, and it is usually in fairly good demand.

At the Dominion Experimental Station, Kapuskasing, Ontario, an experiment has been conducted over a period of years, with the object of comparing the results in yield and quality of seed produced from sowing broadcast in combination with rows 12 inches apart, and in rows 24 inches apart.

The plot seeded with a mixture of timothy and red clover is cut for hay the first year and saved for seed the second, the idea being that the red clover will have largely died out and consequently the stand would be mostly timothy.

This experiment has been conducted in quadruplicate one-fourth-acre plots, using a nurse-crop of either timothy or clover.

In some years it has been found that the first-year meadow has not a good stand and in some cases had to be cancelled. This was probably due, in part at least, to the nurse-crop of timothy.

The average results show that there is not a very great difference between sowing broadcast, and in rows. Considering the fact that the fields sown in rows are more apt to become weedy unless cultivated, which would add extra time and naturally add to the cost of production, it would appear as though the broadcast method is to be preferred.

How Name "Rocky Mountain" Originated

Indians Referred To Them As Great Wall Of Rock

In his diary, while Governor of the Territory of Idaho, in 1870, James Knight noted the arrival of a band of "Mountain Indians" with whom he had "great deal of difficulty" they told him their country was "very mountainous and of a proportion height," as they cannot climb the tops which it is called "Rocky Mountains." The sea lies but a little way to the westward of the mountains. This is the earliest reference to the Rocky Mountains in the records of the Geographic Board of Canada.

In 1720 Beauchamp, the French Governor, transmitted to France a sketch which the Indian, Ochagoch, told him for La Verendrye showed the Grand Portage route to Western Canada from Lake Superior. This map indicates the mountains de "Pierres Brillantes," a name which is found in translation "mountains of Bright Stones" on Jonathan Carver's map, 1778.

The mountains are referred to by their present name in Legendre's St. Charles Journal of 1782. He called them "montagnes de Roche." The name is a translation of the Indian name in Cree is "asowawak" in Stoney "alaha," and in Blackfoot "matskita." Viewed from the prairies, the Rockies present a great wall of rock.

Composers Well Named

Meaning Of Names Seems To Be Carried Out In Works

The names of musical composers are often as suggestive of their work as are those of people in other spheres of life. Handel means commerce or business, and there never was a more businesslike composer than "the giant Handel." Haydn has a name which means "the mow," or "of the fields," which may account for the fresh, healthy character of his music. Brahms is nearly the same, but harder and more motherly, for the name means nothing more than "the father of the house."

Wagner is a name which grows in abundance in the district from which the Hamburg composer's family came. Or might also indicate the flowing character of the music of Bach does not come from his name, which means brook, or the brightness of the word "Veni" (General) or the driving style of Wagner (Charlwig), while Beethoven, and many other names, carry equally obvious suggestions.

Canada In World Court

Senator Raoul Dandurand, Canadian delegate to the council of the League of Nations, announced in the House of Commons that Canada would shortly deposit with the league the instruments ratifying the protocol by which the status of the world court of international justice are revised in connection with Canada's entry into the world court.

The Canadian parliament recently approved the ratification.

Alcohol is being used extensively as a motor fuel in the Philippines.

Britain Leads In Imperial Flying

New Lines Of Luxurious Airways Are Last Word In Luxury

Julius Fleetlow over the English Channel last twenty-one years ago was the first in a long line of aviators who have been able to get on top of the air which are the final descendants of the machine he navigated on that occasion.

British Imperial Airways are putting into commission in a few weeks a fleet of air crafters between London, Paris and other cities, which are as far in advance of the Fleetlow machine as the Bremen is ahead of the packets which brought our forefathers to this country a century ago.

They will carry forty passengers, plus two pilots and two stewards. There will be two cabins, one of them for smokers, but each as commodious as the drawing-room of an average home, being sixteen and a half feet long and more than half that in width. The cabins are decorated on a scale never hitherto attempted except by a firm used to decorating the ships. They are decorated on a scale never hitherto attempted except by a firm used to decorating the ships.

The big Dornier machines have, they will carry forty passengers, plus two pilots and two stewards. There will be two cabins, one of them for smokers, but each as commodious as the drawing-room of an average home, being sixteen and a half feet long and more than half that in width. The cabins are decorated on a scale never hitherto attempted except by a firm used to decorating the ships.

Of course, it is an all-British achievement, the air liners being built by the Handley-Page Company. Undoubtedly it will be as easy for these air liners to travel between London and Bagdad, as between London and Paris, with the necessary stops, between the two cabins, and tables are provided for each.

This, of course, is an all-British achievement, the air liners being built by the Handley-Page Company. Advice From One Who Knows

Immigrant Who Has Prospered Says Newcomer Must Take Job Offer

Last time four years ago, Thomas Nicholson arrived in Montreal from England. After several weeks of work, he was wondering about his future. He applied to the Protestant Employment Bureau for a job, following a series of visits he returned to the office of his benefactors, in good health, prosperous and enjoying a good position in the West. He is returning from a visit to England.

"The man who wants to make good in Canada must be prepared to accept whatever is offered and must at all events fit himself into his new sphere of life. He must be in a good position," Mr. Nicholson declared. He found during the first months of his stay in Canada that he was able to accept better employment. He did so, saved up and went to the harvest fields, where he again saved some money which enabled him to reach Vancouver. After several weeks of hard work, he rose rapidly to his present position as assistant manager of a divisional plant.

Had First Choice

The doctor of a country village had two children who were acknowledged by the inhabitants as being the prettiest little girls in the district.

While the two children were out walking one day, they happened to see a young man in a velvet coat, and lived in the village and the other was a visitor.

"I have to walk to a place ten miles from here," said the visitor. "I can help you."

"Have you a car?" "Yes, but I will walk with you and that will only make 5 miles each to walk,"—Pages Gales, Editorial.

"Go home and go to bed."
"I dare not."
"Why not?"
"Last night I dreamt of work."
—Naples Laing, W. L. Borge.

"I have to walk to a place ten miles from here," said the visitor. "I can help you."

We Pay Your Grocer the Drop in the Price of

RED ROSE TEA

We Bear the Loss

So you can now buy from your grocer, at the reduced prices, the Red Rose Tea he has in stock, regardless of the prices that may be on the packages.

Everyone who uses Red Rose Tea is guaranteed at all times the best value that tea can be.

And every merchant who sells it is guaranteed a fair profit regardless of markets or tariff changes.

CHAPTER XIV.—Continued.

Before there had been talk of building a main schoolhouse in the center of the town; but the plan had been abandoned because so many of the children came from farms outside the village that it would have been necessary to send a bus to collect them, and the old way seemed easier.

Thus Charman began her duties as teacher in the very room where she began her school days nineteen years before. The small, brick building was unchanged save for an impressive sign over the door which read, "Lincoln School." This replaced the battered, weatherboard board that had designated "District Four," and was a concession to the daring souls who declared that district schools had "gone out of fashion," and that "Witchfield would be a laughing-stock to the entire country unless some change in its educational system was made."

"You'd think to hear 'em talk," raged Deacon Purdie, who always flared into speech at any mention of spending money, either by the town, himself, or one of his neighbors. "That we folks that went to the old schools dirt education! I guess what was good enough for us is good enough for the smart Alecks that folks in 'nairs' these days. I caught that Eldridge boy make 'em a disgraceful—er—gesture at me the other day!"

"If he'd caught all the people who would enjoy doing the same thing," grinned Jimmy Bennett when Grandma related this place and gossip, "they'd reach from here to the district school that he's so keen about! The darned old hypocrite!"

But this time Deacon's faction had triumphed.

"If it hadn't," said Grandma regretfully when Charman told her that the coveted "job" was landed, "it would be a sight easier for you, child. You'd have been working about the east part of the day to talk that distance. It makes me shiver just to think about it. I want you to be glad to wait it for you. He'd soon change his mind about whether young folks deserve a better school building!"

"Now don't begin worrying about next winter," laughed Charman. "I dare say the exercise will do me good. I don't get half enough as it is now."

It was the first of August when Charman was notified of her appointment. Other events followed quickly on its heels, the most aston-

"Well," said the old lady, "I've no doubt that Mr. Merry and under and made allowances. Probably he had considerable trouble getting his own part of the sermon. Mr. Merry is a real human if he is a minister. Did you know if Lulu had a new dress, Jimmy? I'd admire to see it!"

"Mother said it was an old one, fixed up," replied Jim glibly. "Guess Edgar spent the ceremony on his love, so suddenly (considering the recent quarrel), that she didn't have time to visit her modiste."

Charman giggled while the doctor reproved her by saying: "I'm shocked at your levity, Miss Davis. This is a serious matter, Lulu."

"I'll say it!" said Jim. And this, with a glance at the lawyer, and it was over. Glad, if you could see there. He's referring to a business transaction I had with the deacon. Well, Grandma, I must run along or be late to dinner. All's well that ends well, and so long as Lulu thinks about getting hitched. Anyway, I'm a costly product of the Orient, why harm does you. You going my way, Jim? I'll give you a lift."

"You're a dandy matchmaker, Grandma," remarked John Carter, as the callers departed and he took the chair beside her.

"Matchmaker!" echoed Grandma indignantly. "If I thought I'd had anything to do with giving those Moore children such a mean stepfather, I'd never rest easy in my grave."

George K. and Selma. They were waving. A nice couple if ever there was one, and successful, too. Selma can wear a silk dress every day if she wants to; but when they were married George K. was just beginning at the bank and earning less than a dollar a week. Now he's president, and his three boys all went to college and are a credit to him and their mother. One of 'em writes poetry, and gets it printed in the magazine. I've always thought that if Charman had more time she could be a writer. Once she wrote a real pretty piece about—"

"I can't vouch for comparisons," smiled the doctor, "but in my twelfth year I produced a masterpiece that caused a riot in the family. It began:—"

"The sun was setting over the battlements. It shone on ladies and on the gentle."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

"I can't vouch for comparisons," smiled the doctor, "but in my twelfth year I produced a masterpiece that caused a riot in the family. It began:—"

"The sun was setting over the battlements. It shone on ladies and on the gentle."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

"I can't vouch for comparisons," smiled the doctor, "but in my twelfth year I produced a masterpiece that caused a riot in the family. It began:—"

"The sun was setting over the battlements. It shone on ladies and on the gentle."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

"The sun was setting over the battlements. It shone on ladies and on the gentle."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

"I can't vouch for comparisons," smiled the doctor, "but in my twelfth year I produced a masterpiece that caused a riot in the family. It began:—"

"The sun was setting over the battlements. It shone on ladies and on the gentle."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

RUSS are quickly Soothed & Healed by Mam-Buk

"Of course she did," said Grandma seriously, though her lips twitched. "Don't giggle so, Charman. You're hurting the doctor's feelings. Is dinner ready?" I feel hungry after so much excitement; and I presume Lulu (Baker!) be over soon as she sits."

(To Be Continued.)

THE REASON WHY

Thin Weak Children Need Baby's Own Tablets

Malnutrition or inability to derive nourishment from food, is a common trouble with little children and is entirely due to stomach and bowel weakness. Another cause of loss of flesh and sleep is nervousness and indigestion. Stomach and bowel troubles and thus banish constipation and indigestion. Baby's Own Tablets are simple and safe; expel worms and allay the pain of colic. They are the cutting of teeth is what Baby's Own Tablets were designed for. They never fail to be of aid and can be given with safety to the youngest babe. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents per box from Dr. Williams' Medicine Co., Brockville, Ont.

May Improve Radio Reception

Magnetic Observations Are To Be Taken In Polar Areas

Better weather forecasts and radio reception may result from a year's international study of magnetic measurements in the polar areas, Captain H. U. Sverdrup, noted Norwegian explorer, said.

Simultaneous observations near both poles in 1932-33 will gather magnetic auroral and meteorological observations through a network of stations in the Arctic and Antarctic. The International Committee of Meteorological Directors expects the increased knowledge gained to be of practical application to problems connected with terrestrial magnetism, marine and aerial navigation, wireless telegraphy and weather forecasting.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms ten, and at the same time, they are said to be the most effective of tonics in their effect upon the digestive organs. They are said to be healthy food operation and ensuring immunity from further disorders from such a cause.

Innovations On Ocean Liner

People Crossing Atlantic Have More Than 4,000 Comforts

Among other innovations upon a new 45,000-ton liner that is being built in Italy there are promised a theatre, library, and a swimming tank, besides a ballroom, telephone, cabarets and the like, so that very soon passengers who make the Atlantic crossing will hardly realize that they are at sea at all.

If many of the old shellbacks who manned the famous tea clipper a century ago could return their comment upon these floating palaces would be amusing, and probably not very complimentary. There are still a number of people who enjoy the freshness and freedom from land worries that is the delight of sea voyages, and they will be thankful that there are still many ships that are comfortable without being too reminiscent of life ashore.

No Athlete Remedy Like Dr. J. D. Kellie's Asthma Remedy is directly different from other so-called remedies. Were this not so, it would not have continued its great work of relief until now. From ocean to ocean for its wonderful benefit, Kellie's is the best of all asthma remedies, stands up to the test of time, and is the hearts of thousands who have known its benefit.

Blue Bird Moved Because July Twenty-Nine at Dallas, Texas, was restricting the growth of the city. It is being moved two and one-half miles and placed in a new-made "bluebird" house. The twenty-five miles of equipment, 30 feet high and 184 feet, thick at the base, will transport the stream when the task is finished.

The Moscow government has approved a change in the calendar and time hereafter will be dated from the date of the date of the Bolshevik revolution.

Meal the Sprouts with Minard's

Propose World Trip In Sailing Vessel

Would Take About Eighteen Months and Make Real Holiday

Business men in quest of a thorough holiday, who can enjoy an ocean voyage on an old-fashioned sailing ship, have an opportunity of an unique trip if they accept an invitation which was reported to the Montreal Board of Trade at its council meeting recently.

The council was advised of a proposed, round-the-world trip in a square rigged sailing vessel of about 3,000 tons, registered, sailing from New York on or about September 10 next. The trip will take about eighteen months and stops will be made at practically all the principal ocean ports of the world. While the vessel is equipped with auxiliary engines, it is expected that these will be very little used and that as nearly as possible the voyage will conform to the conditions prevailing in the old sailing days. The ship will be manned by a capable captain and a large crew, and excellent passenger accommodations will be provided. As the accommodation is limited, only about fifteen couples will be taken as passengers.

Little Helps For This Week

"Commit thy works unto the Lord, and thy thoughts shall be established."—Proverbs xvi, 3.

When first thy eyes unveil, give thy heart to God, thy body but fore-

To do the like; our bodies but fore-

The spirit's duty, True hearts arep-

Give Him thy first thoughts then; so

His count thy day, and in Him

sleep.

—Henry Vaughan.

Every morning before we cross our threshold, before we make a single plan or appointment for the day, we must give ourselves unto our Father's business. We are not, as we sometimes do, to determine what we will do, and then devote it to God, but we are first to devote ourselves to God, and ask Him what we shall do.—Alexander McKenna.

Man Without a Country

Man without a country, who thought for Canada in the Great War, is officially a "man without a country." Though an alien, he is permitted his liberty for U.S. federal immigration have tried three in vain to find a land to which they could deport him.

Most of the street accidents in England are among people between 16 and 20 years old.

Turkey is conducting a campaign against juvenile gambling.

London's Moving Stairways

Will Be Speeded Up To 150 Feet a Minute

The moving stairways connected with London's famous underground railways are to be speeded up. At present this speed is 90 feet per minute. Experiments are being made with a stairway travelling at 150 feet a minute. Regular passengers who slip on and off the escalators with agility, would be glad to have it so fast, but the many who still regard them as perilous innovations will be more inclined to resist it, they are now to use the omnibuses.

"After Baby Came I Was Weak, Skinny Gained 22 Lbs."

"After baby was born I was very weak, skinny. Blisters broke out on my chest, back, arms, legs. Gained 22 lbs." — Mrs. Laura Bennett.

Thousands write new letters every day. Baby milk adds 2 to 10 lbs. in 3 weeks. Ugly hollows fill out. Bony limbs get graceful, rosy cheeks, skin clear and rosy like magic. Nervousness, indigestion, constipation vanishes overnight. Bound up new pep from very first day.

Two great tones in one — special weight-building malt yeast and strengthening iron. Pleasant little tablets. For stronger than immediate yeast. Results in 14 days. No nasty taste, no "alkali" tired, no gas, no "bloat." Ask for "Baby's Own Tablets" from drugist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Especially, the international language, is built up from the roots of 800 words, chiefly of Latin origin.

"Do Not Hesitate to Try It"

"Your Vegetable Compound is a good medicine. Anyone who is in poor health or who is too indolent to try it. When I was taking the Vegetable Compound I tried the 'Ever-Pile' I found in the packages. I have taken them every night since and I can't say enough for them. I am so thankful for the good things they do for me that I have told several women about it."

—Mrs. G. W. Poirer, 264 Hume St., Stratford, Ontario.

Gyproc Makes Summer Homes FIRE-SAFE!

PROTECT your family by making your Summer home draught-proof, dust-proof and fire-safe. The new yellow Gyproc, that does not burn, will render your service at small cost.

Use it for structurally strong walls, ceilings and partitions. It needs no decoration (when painted) but you can add, paper or plaster, or paint, or any easily applied, is a permanent asset, and is easily superior to other building materials.

Your dealer's name is listed below. Ask him today for full information on Gyproc Wallboard or send for interesting free book "Building and Remodeling with Gyproc."

G. M. Blackstock, K. C., Conservative candidate, will address the Redcliff electors in Cliff Hall on Friday evening, June 25th. Come and hear the issues of the day discussed.

Miss Kelsen and Miss Boyle of Portage la Prairie, Man., were guests of their cousins Mrs. and Mrs. E. C. Hargrave this week. Mrs. Hargrave entertained in their honor Tuesday afternoon.

On Friday evening of this week the two town teams play off the Bennett Shield game, a contest in which these teams have already played two tie games. Our advice to the supporters of both teams is that they keep their heads. Don't let your enthusiasm for your team get the better of your sane judgement. Let us show outsiders that Redcliff has sports who are big enough to appreciate having two good football teams in town and also big enough to all join together after the game is over and congratulate the winning team. Players should also remember that when excitement is at its height in a game they too should watch their movements and not resort to any unfair tactics which would give the crowd cause for complaint.

Town Teams Play Two Draw Game

In Bennett Shield—Another Game on Friday.

During the past week Redcliff football fans have been treated to two of the most exciting and most stubbornly contested games seen here for some time. These were between the two town teams in the first round of the Bennett Shield competition. Both games ended in a draw and both were scoreless games.

It would be impossible to single out either team or any of the players for special mention in either of the games as the full line up from one end of the field to the other worked hard and steadily from the first to the final whistle and there was not an idle moment throughout both games.

Naturally excitement ran high and as both teams had their share of supporters the crowd was kept on tip toe watching the play.

Despite the excitement the crowd kept themselves well in hand until near the finish of the second game when an unfortunate clash occurred which marred the friendly rivalry for a few minutes. The result of Tuesday's second tie game leaves the Bennett Shield standing still undecided between the two town teams and a third game is necessary. This game will be played Friday evening of this week.
